

Founded in 1998, Aeroco has continually expanded our support and services.

Having started our journey with a focus on passenger seat maintenance and paint support, Aeroco now offers a full suite of repair, manufacturing and maintenance support services.

With a global customer base, Aeroco Group provides support to Airlines, MRO's and Leasing Companies within the commercial and private aviation sectors.

Airbase UK Interiors Ltd is a leading provider of cabin products and services. We take pride in our commitment to quality, reliability, and customer satisfaction.

Whether you require bespoke soft furnishings, product design, professional-grade dry cleaning, stock management or seat repair services, we have the knowledge and resources to fulfil your requirements.

Located near London Gatwick Airport, with a team of over 60 employees, we utilise our 30 years of experience in managing aircraft cabin interiors to provide reliable, turn key solutions for your cabin management requirements..

Recognising the benefit of having an in-house Part 21J Design Organisation we are looking to introduce Airbase Design in early 2024. This will allow us to offer further nose to tail design solutions for our customers.

Using Airbase UK Interiors' many years of experience and identifying common issues within the industry we have developed several in-house applications to assist with our production and servicing needs. We aim to offer these solutions to similar organisations

## Part 145 Dry Cleaning services

Based at Gatwick, our dry-cleaning services allows curtains & fabric seat covers to be cleaned and recertified as airworthy utilising our UKAS registered burn test house

## **Part 145 Seat maintenance**

UK based engineers with seat inspection, repair, overhaul and modification capabilities

## **Cabin refresh teams**

Manpower dedicated to the removal and replacement of covers, curtains and carpets

**AIRBASE**  
INTERIORS

## Part 21G Soft furnishing production

In conjunction with the Life Vest Pouches, we also cut and sew Curtains, Cabin Seat covers & Cockpit seat covers

## **Part 21G Carpet production – cut, sew and overlock services**

We provide the necessary experience using skilled technicians and CNC manufacturing technology to supply carpet kits and fitting services to a wide range of customers.

Services provided:

- Carpet Cutting
- Carpet Overlocking
- Supply & Fitting Services

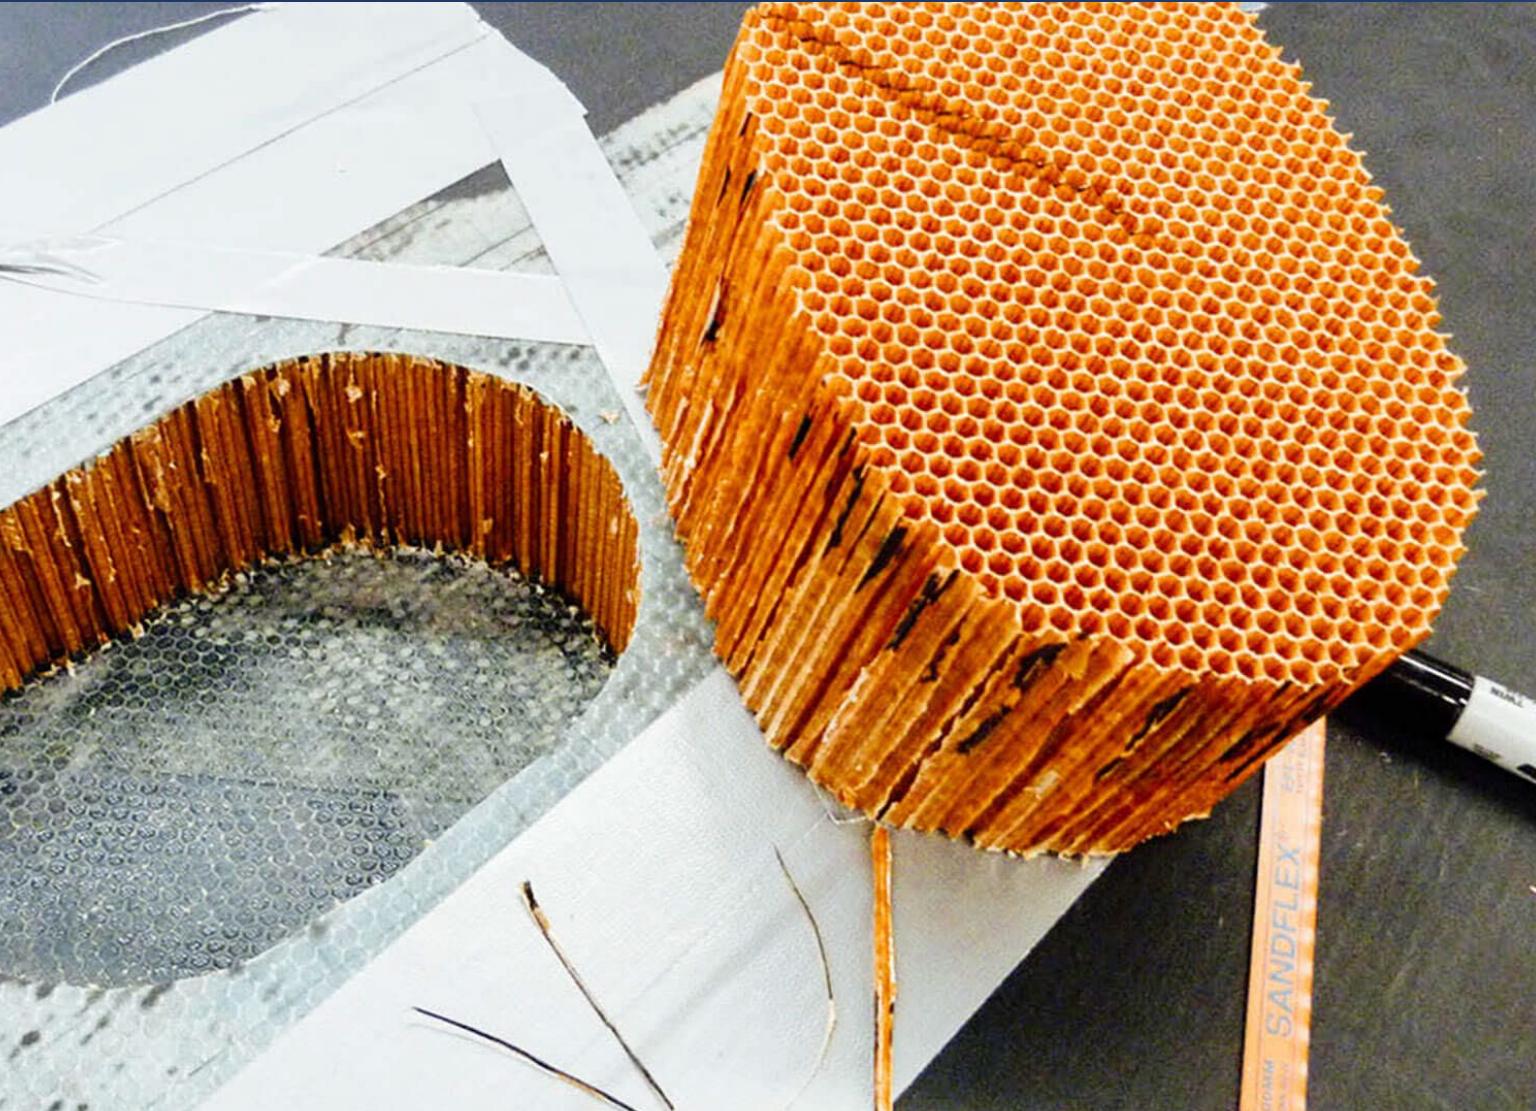

## Part 21G Cargo & Cabin panels

The replacement panels we engineer for cargo floor, ceiling, sidewall and cabin floor are all the highest specification and conform to both Airbus and Boeing approved standards.

All panels are complete with the latest anti-slip coatings and fitted with the associated decals and markings as standard.

By using the latest aviation technology and high-impact resistant composite materials with reinforced upper facings, our panels will offer a longer operational life.

## **Part 21G Filters – Galley or Lavatory filters throughout the aircraft**

Airbase UK Interiors have the capabilities to manufacture and supply Cabin Filters on Form 1 release

## **Part 21G/ 145 Composite repairs & production**

We have a full range of composite and metal workshops to support all types of repairs. From Cargo Loading systems to composite partitions and doors, our expert engineering team can support all types of repairs

## Batteries – Capacity checks, recharge, performance review and overhaul

Our Aircraft battery technicians carry out capacity checks, regular checks and overhauls to main and emergency batteries to ensure optimum performance and power

## Decals & Liveries

We provide the aviation sector with a range of graphic and registration products for all fleet types, with certification for CofC or Form 1 release

## Aircraft and component Painting – external and internal parts

Aeroco have specialist paint technicians on site who carry out exterior touch ups and repairs as well as offering installation & supply of decals at Hanger bases and Airside

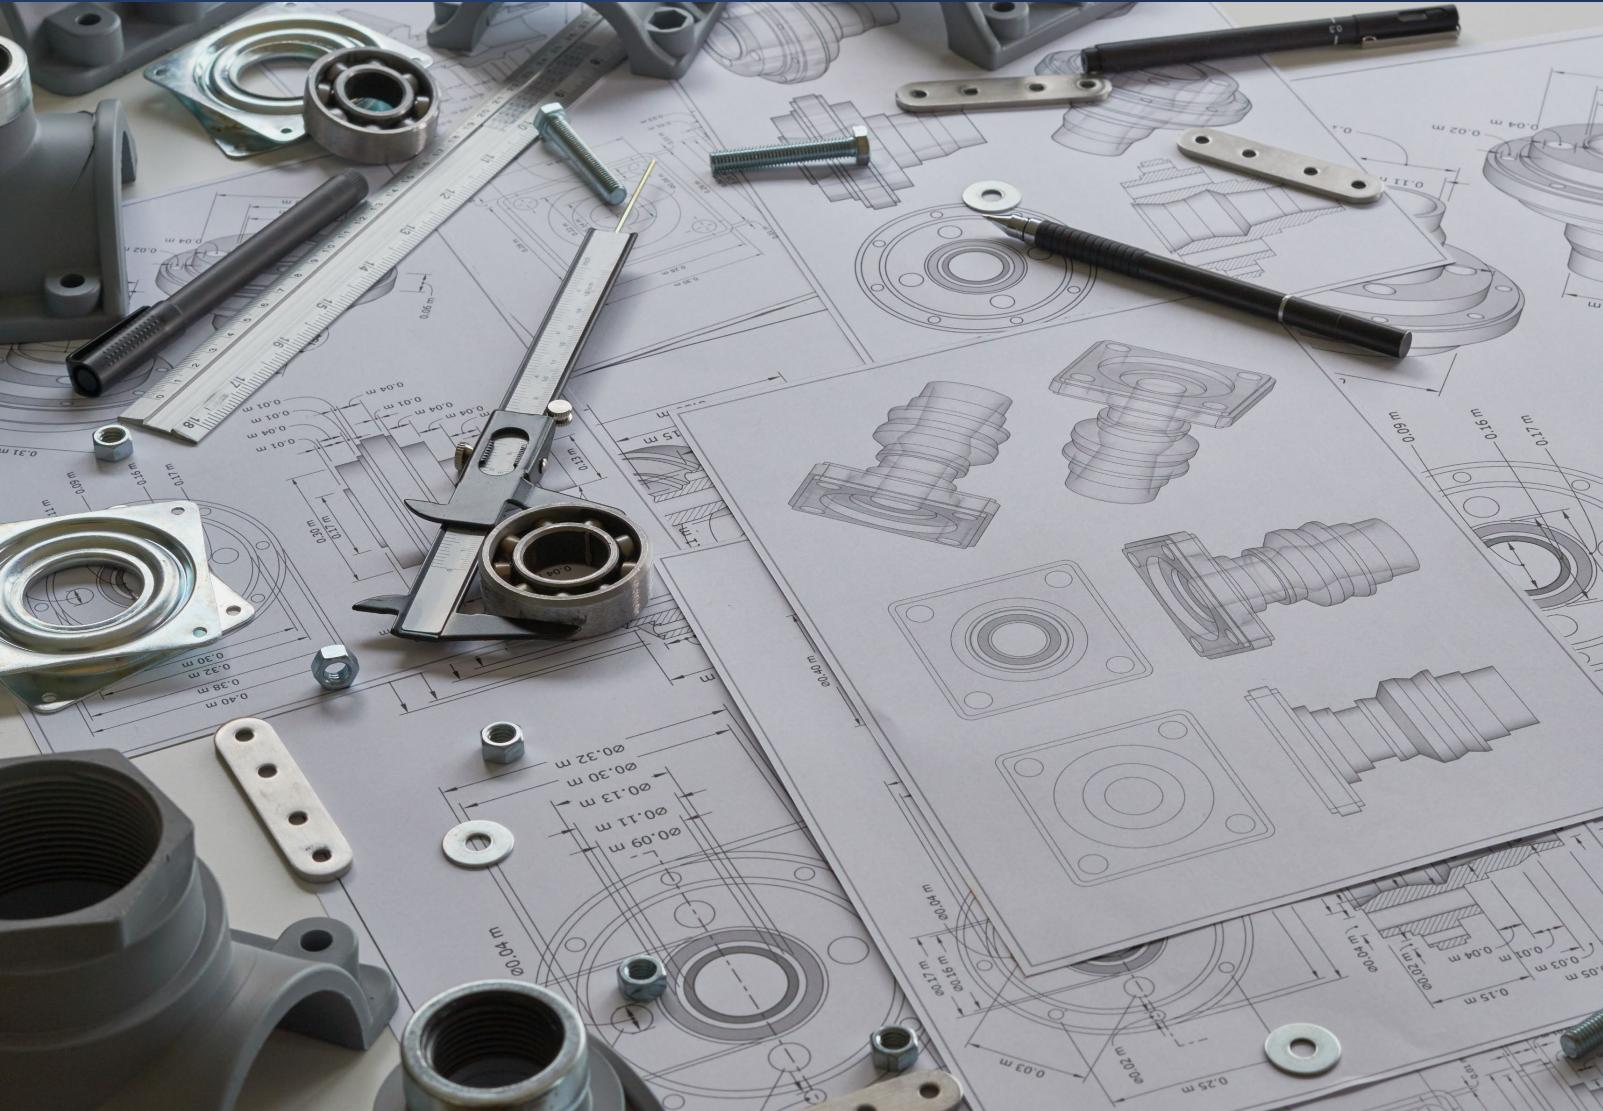

## **21J modifications in conjunction with our 3rd party partners**

We have a range of 21J organisations who we collaborate with on a vast number of projects ranging from design data transfers to new introduction of cabin interior products
